

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CORRESPONDENCE.

To the Editor of the American Naturalist:

Sir:—In *The American Naturalist* June, 1903, p. 385, Mr. J. H. Powers says that the metamorphosis of *Amblystoma tigrinum* is due to nutritive causes. Be pleased to rectify that the same conclusion was published by me August, 1899, in *La Naturaleza*, Ser. ii, F. iii, p. 369. The title of my notes is as follows:

“El Ajolote sufre la metamorfosis general en la clase de los batracios, por aumento de nutrición y no por cambio de medio.”

Experiments and observations in the latter where *Amblystoma* was first observed, show that metamorphosis is very slow in artificial or natural conditions, if the animals are feeble, and very rapid in the best conditions of nutrition as in deep waters of Xochimilco, a lake that never becomes dry.

The dogmatical views on adaptation of *Amblystoma* are wrong and the paper of Mr. Powers has only attested my own published conclusions.

I am very respectfully yours,

A. L. HERRERA.

Mexico, Oct. 12, 1903.
